

RAPIDLOADER

Static and Moving Loader.

Automatic Glass Loading at the Cutting Line

You can feed your cutting table automatically from up to 5 + 5 Positions with the RAPIDLOADER. The sheets will be loaded gently from lateral located racks and feed to the cutting table in order to the requirements of the cutting-plan.

Sheets will be separated from the remaining pack, starting from the bottom, what ensures very high reliability and controlled movements and drastically reducing the risk of pulling several sheets whilst loading.

The RAPIDLOADER will fit into almost any production facility, without particular requirements to the ceiling height of the building, due to its compact design.

High Performance in Glass Handling and Cutting

4 Variations for up to 10 Loading Positions

Whether 1, 2 up to 5 or even 10 Loading Positions are served with the four different versions of the RAPIDLOADER.

- Type BSL-M 2 sided loading as well as movable Version for direct access for up to 10 Loading Positions (5+5).
- Type OSL-M One sided loading as well as movable Version for direct access for up to 5 Loading Positions (5+1).
- Type BSL-S 2 sided loading, non-moving Version for direct access for up to 2 Loading Positions (1+1).
- Type OSL-S One sided loading, non-moving Version for direct access for one Loading Position (1).

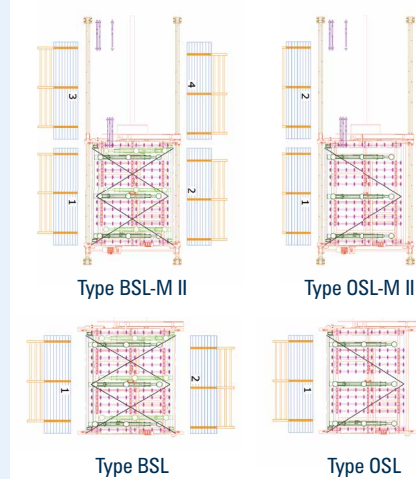

Performance Features

- Fully automated Loading system for a Cutting Line with up to 10 Loading Positions
- Sheet separating from bottom for secure glass removal
- Powerful drives for high acceleration and speed
- Stacking of cover sheets onto another loading position
- Spacer detection to display spacer removal
- Centralised control through the HEGLA Cutting Tables
- The RAPIDLOADER is compatible with the Warehouse System type RAPIDSTORE and system cutting table RAPIDLINE, as with any other HEGLA cutting machine

Configurations / Options:

- Available for Jumbo size (6.100 x 3300 mm / 240" x 130") and Half-Jumbo size (3.810 x 2.750 mm / 150" x 108")
- Free selection of numbers of loading positions
- Different colour coding (RAL colours)
- Reinforced Version for 19mm Glass
- Module for remote maintenance
- For even higher acceleration and faster longitudinal and traversal travel is the RAPIDLOADER as version Plus equipped with more powerful drives
